Subject: East Durham - request for Q&A format

Hi Mark,

Please see the attached letter re: the request for a Q&A format. I hope Council will be satisfied with our proposed changes.

Could you kindly let Council know of our decision.

Thanks,

Derek

Subject: RE: East Durham - follow up items.

Hi Mark, Sarah,

In advance of our delegation on Monday and as followup to our previous meeting with staff, I'm sending some information along. This information will form the basis of our talking points with Council. Please provide this information to those attendees that were seeking the information.

1. Axle weights for turbine deliveries - see **attached** spreadsheet from GE on axle weights for the GE 1.6MW turbines.

2. Haul routes - see **attached** map and table below which outlines intersections along the haul route. These are considered draft for your consideration and based on available information we have at the current time.

1	Grey Rd 4 Artemesia Glenelg Townline
2	Southline Rd Artemesia Glenelg Townline
3	Concession Rd 4 Baseline Rd
4	Grey Rd 4 Grey Rd 23
5	Grey Rd 4 Baptist Church Rd

3. Clarification on standard construction of buried cabling - For your review see the **attached** drawing which shows the trench system for our underground collection at the recently constructed Conestogo project in Wellington County.
4. More details on the Emergency Action Plan - Doug McIntosh has emailed Phil Schwartz to discuss next steps in working towards finalizing an EAP.
5. Information on lighting requirements from NavCan - Please see **attached** the "TWR Lighting" LED FAA light. You can refer to page 16 which refers to the "intensity of the light" as well as the "number of flashed per minute" etc.
6. Confirm vacant lot receptors and provide map of REA receptor setbacks - see **attached** map outlined REA 550m setback from non-participating dwellings.
7. Existing met tower on Reay property - Our records indicate the met tower on the Reay property (Met 9014) was decommissioned on June 14, 2011. We will therefore need to confirm that is correct as a number of our other met towers in Grey/Bruce were decommissioned around the same time.
8. additional details on insurance policy - sample insurance certificate still forthcoming

Please do not hesitate to contact me if you have any questions or require additional information on these or any other matters.

Thanks,

Derek Dudek | Community Relations Consultant

Hi Derek,

Not sure if I missed it in the report documents you provided to West Grey, but I am wondering if you have GIS mapping that demonstrates how each proposed industrial wind turbine meets the minimum 550 metre setback requirement from noise receptors.

Appendix F identifies some of the deficient property line setback requirements for the proposed industrial wind turbines, but didn't see any maps showing the minimum 550 metre setbacks from noise receptors.

Subject: East Durham - letters
Date: Monday, November 05, 2012 12:37:00 PM

Hello Cllr Cutting,

I'd like to provide some clarification and explanation to the concerns regarding our recent mailout efforts. In September, we wrote a letter intended for participating landowners. Unfortunately, the wrong mailing list was used (the one for general public mailouts), so many letters were mailed out to unintended recipients. To clarify our mistake, we then mailed another letter in October, describing this error and apologizing for the misunderstanding.

Additionally, there seems to be ongoing anger and/or confusion with the names used for mailing purposes, specifically that the names are either in error or include former residents of the land (i.e. deceased residents). I assure this is not done with ill intent or through a lack of undertaking best efforts at conducting our general mailouts.

For our mailings, we use land titles records (kept at municipal and land registry offices) so that all the owners of property in the area would receive the notices (and not just those who live there). This is the most accurate way of ensuring persons are notified. However, land title records are not always up to date. It is often the case that these records are not updated for many years after people pass away, which is unfortunate. This is how some public notice letters end up being addressed to deceased landowners, persons' maiden names, etc. We strive constantly to ensure accurate, up-to-date information is received by the local community and have done our due diligence to rectify any faults.

Please don't hesitate to contact me if you feel there is outstanding information on this matter.

Subject: Letters.

Hi Derek. Just wanted to let you know the residents of Glenelg are receiving their letters to explain the mistake by Nextera on the last mailing but the explanation is ludicrous and are making the already mistrusting residents angrier and confirming to them that this whole project is shrouded in misleading information. It says in the new letter that the intended recipient of the letter were landowners who are participating in the wind project. That is an outright Lie since a number of the names on the inside letters were to people that have died many years ago. And not all those people (also confirmed) are involved with the project. Why these misleading letters would again be allowed to circulate to the residents of this area is beyond me. Waiting for an answer. Bev Cutting

Subject: East Durham - bridge on Concession Road 4
Date: Monday, November 05, 2012 9:26:00 AM

Hello Ken, Mark,

Our engineers were out looking at the water crossing on Concession Road 4, just east of County Road 23, where we have proposed underground electrical cabling for our project. They have determined that a bore under that water crossing is not feasible and are now looking at alternative ways to cross. They have asked me to broach the idea with the Municipality of attaching conduit to the bridge as a way to cross here. Is this something West Grey would entertain with more engineering details to follow of course?

Subject: RE: town hall meeting
Date: Tuesday, September 18, 2012 4:19:00 PM

Hello Cllr Cutting,

You're not the first to notice this. This is a company we hired to conduct this on our behalf and as far as I can tell the numbers are dialled based on telephone exchanges of nearby urban centres such as Durham. But yes, the geographic area extended well beyond our project area and some people were questioning as to why they were contacted when they didn't live in the area. I've passed your technical concerns on to the firm to let them know of the cutoffs.

With respect to why we conducted this forum, it was simply another way to reach out to more people. It was not meant to take the place of any public forums that we are required to undertake as part of the approvals process....i'll let you know the numbers of participants when I hear back.

I did pass along a VIP call in number to Mark Turner to pass along to Council. I hoped you received it. There were no medical doctors on the call. It was either Dr. Chris Ollson or Dr. Loren Knopper from Intrinsic Environmental Services...you can find their bios at www.intrinsic.com under the leadership link at the bottom left of the page.

The engineers were internal to NextEra. I'll try and find out who was on the call.

Hello Derek, Wondering who decided to hold at the last minute a phone town hall meeting and who chose who was called to participate and who was left out. People in the project area were not called and some were. It didn't seem to have any structure. Also I was not connected to the already in progress phone meeting at 7.59 and was cut off at 8.12 I had to fly to my friends to hear the rest. It was also 1 hour long. Are you kidding. I heard of numerous people who were on hold for the majority of the hour and then a polite well thankyou for participating and good night. How frustrating for all of us. Also who were the doctors and engineers giving their advice. Could you please supply names and credentials for me. thanks Bev Cutting

Subject: East Durham - unopened road allowance

Hello Mark,

Could you confirm for me that the road allowance running north/south between Lot 25 and Lot 26 Concession 4 NDR is indeed still an unopened road allowance, or if it has been closed by by-law? For quicker ID it is the road allowance southwest of Concession 4 and Artemisia-Glenelg Townline and near our proposed Turbine 14.

It appears to be an unopened road allowance as per the County GIS, but I would like to be certain that it hasn't been closed in more recent times.

Thanks,

Subject: meeting request

Hi Derek,

West Grey Council has requested me to arrange for the NextEra Energy Operations Manager to come to the September 24, 2012 Committee of the Whole Meeting to discuss the emails that Councillor Cutting has received from you.

A couple of the emails relate to emergency response matters, and it is Council's opinion that these emails do not satisfactorily address emergency response concerns relating to the proposed wind turbines, as Council previously indicated the Municipality does not have the resources to perform high angle rescues and therefore NextEra Energy will be responsible to provide their own emergency response personnel.

Please advise if the NextEra Energy Operations Manager is available to attend this meeting and Mark Turner, Clerk will in turn advise of the meeting time.

Thank you.

Christine Robinson, MPA, BA, CMO

Chief Administrative Officer

Hello Cllr. Cutting,

Attached is a draft copy of an overview of Emergency Response for the East Durham Wind Energy Centre Project.

We would be happy to go over this with you in greater detail, including the detailed Emergency Action Plan referenced in the attached document.

I would like the opportunity to introduce you to Doug McIntosh, who is the new Operations Manager for all of our Ontario projects, and who I know will be able to address many of your concerns regarding emergency response.

Perhaps we could schedule a meeting with your Fire/EMS boards, or with Municipal staff, or both....I leave that entirely at your discretion.

Please don't hesitate to contact me to move this discussion forward.

Thank you,

Hello Mr. Marcell,

I was wondering if you could assist me with an issue I'm having as part of our East Durham Wind Energy Centre project.

The attached pictures below outline a parcel of land that has been identified in the County Official Plan as being a known landfill site which states:

The policies in the OP are as follows:

5.4.2 EXISTING AND KNOWN ABANDONED LANDFILL SITES

(1) All existing municipal landfill sites are identified on Appendix A to the Official Plan. All known abandoned landfill sites have also been shown on Appendix A.

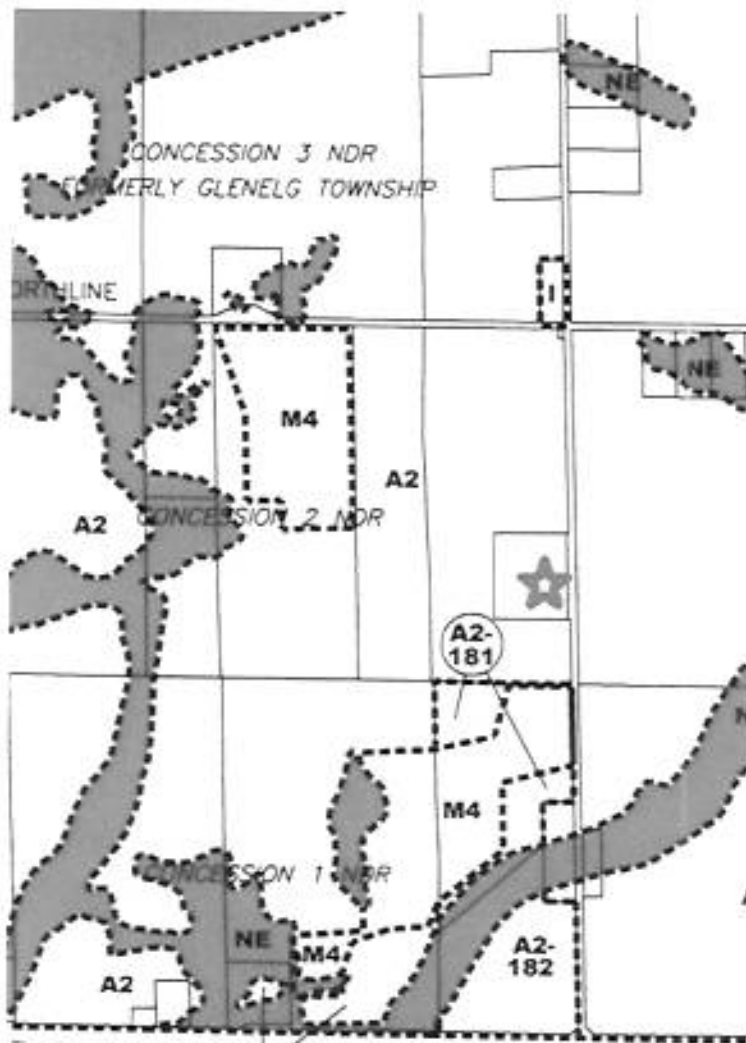

(2) No development or site alteration shall be permitted within 500 metres of an existing or known abandoned landfill site, unless an Environmental Impact Study is prepared indicating that the lands to be developed are secure from potential methane gas and/or leachate migration from the landfill site.

(3) Appropriate setback provisions shall be established in the implementing Zoning By-law

However from a zoning standpoint the property is zoned Agricultural A2 which permits a dwelling. Would you require an EIS before issuing a building permit on this property. *[Terry Veenstra]* Yes As part of our planning work we need to identify which vacant lots could be developed for residential purposes for noise modelling purposes.

Also, do you know if it is closed or operating landfill? If closed, when? *[Terry Veenstra]* Closed and capped in 2008.

Thank you,

Thank you Cllr Cutting,

How would you like to handle that matter. Perhaps I could have our Ontario operations manager contact you about emergency action plan matters, or better still arrange some sort of presentation to your Fire/EMS board. Let me know and we can look at possible dates if that's the case. In the interim I will see about getting a draft "East Durham Emergency Action Plan" or forward a similar template.

Subject: East Durham - July 18 open house
Date: Monday, July 16, 2012 2:39:00 PM

Hello Mayor Eccles et al,

Just a quick reminder to remind you of our upcoming open house on July 18 at the Durham CC from 5-8pm.

I just wanted to advise that we very recently confirmed that we will be sharing a draft layout of the 14 turbines at this event. I know this matter came up at our last delegation.

Hopefully we can schedule a delegation in the near future to discuss specific matters that come up at the open house and to go over the draft layout in more detail.

Thank you and please don't hesitate to contact me with any questions you might have.

Hello Christine, Mark,

Attached is a draft of our standard Community Vibrancy Fund agreement which we've introduced and/or entered into with lower/single tier municipalities where our Ontario projects are located. We may have noted this in passing at our last delegation. Obviously it is not a mandatory agreement, but is one way we are trying to add benefits to the broader community that won't directly financially benefit from the project. We'd be happy to discuss this at our May 28th delegation in more detail, if you feel it is appropriate. Please feel free to forward to Mayor and Council in advance of any discussion on the matter.

Thanks and don't hesitate to contact me with any questions,

Subject: East Durham - clarification re: 550m setback
Date: Friday, March 02, 2012 9:11:00 AM

Hello Mark,

Just wanted to follow up with you about a short conversation we had after our delegation to Council.

I had mentioned in the Q&A with Council, after our presentation, that the 550m setback would not apply to a person building a new residence in proximity to an existing turbine.

You mentioned that you had heard the opposite was true.

I had a conference call with the MOE and they confirmed what I said inasmuch as there is nothing in Provincial regulation that would prohibit new dwellings from being built closer than 550m to an existing turbine. They said that is a local decision that is up to the individual municipality to consider (ie. if West Grey wanted to impose such a restriction, it would be done at the municipal level through zoning).

Hope this helps, and let me know if there is any additional information you might require from us at this time. I'd also like to try and schedule a time to come and give another delegation to illustrate the siting process.

Thanks,

Subject: East Durham - PDR and MCF
Date: Thursday, February 09, 2012 1:26:00 PM

Hello Mark and Sharon,

This email is just to provide you with a heads up that updated information with respect to our East Durham Wind Energy Centre project is being couriered to your offices in the next couple of days, to each of your individual attention. Ontario Regulation 359/09 requires that this material be forwarded to the Clerk in each municipality where our project is located.

The material consists of the updated Project Description Reports (PDR) and Municipal Consultation Forms (MCF) for staff review. The PDR's provide high level information on the projects, while the MCF's are intended to form the basis for municipal comments to the Ministry of the Environment.

Please note, we are not currently requesting that you fill out the MCF's, but rather are providing them, as required, to turn your municipality's attention to matters which are of interest to the Province, and where municipal input would be required.

Sharon, I have cc'd Scott Taylor on this email, as he has been our main point of contact at the County on this project to date, and can probably fill you in on any matters relating to our project.

Please do not hesitate to contact me if you have any questions.

Thank you,

Attachments: [County Forest Management By-Law.pdf](#)

Hi Derek,

Not sure about the Municipality of West Grey, but the County has a Forest Management By-law (formerly referred to as our 'tree cutting by-law'), which has been attached for your reference and can be found on our County website at:

<http://www.grey.ca/services/forests-trails/>

I believe the by-law you are referring to below was a dated version of the above-noted by-law.

Hope this helps and just let us know if you have any further questions.

Thanks

Scott

Hi Mark and Scott

Does the Township have a tree cutting by-law? Or is it a County matter?

I've seen reference to Grey County By-Law 3558-96....is that current and in effect?

If so, would it be possible to get a copy?

Thanks,

Hello Mayor Eccles,

I was reading the following article in the Owen Sound paper (<http://www.owensoundsuntimes.com/ArticleDisplay.aspx?e=3386139>) and we'd be happy to address the issues raised in the article and any other issues Council may have on our project. I believe most of them could be answered easily at this time. I hope there isn't a sense that we haven't been available to Council since we were awarded a contract for this project. As you can see from the chain of emails below, we've been making ourselves available at your discretion through different formats.

Please don't hesitate to contact me if you think we should schedule a delegation or workshop as we'd previously suggested.

Thanks,

Derek Dudek | Community Relations Consultant

Hi Derek,

In the last paragraph of the letter from NextEra Energy it refers to Section 239(3.1) of the Municipal Act vis-à-vis conducting a workshop outside of public Council chambers. I have looked in the most recent update to the Municipal Act in the "e-laws" website, and do not find any reference to Section 239(3.1).

Can you provide a copy of the contents of the Section of the Municipal Act that NextEra Energy has referenced in their letter.

Hello Christine, Mark,

As per this news article, it sounds like Council and/or staff would like an update. As we indicated in our August letter we'd be happy to meet any time. I believe you indicated in September that you were looking into further action and would get back to us.

<http://www.owensoundsuntimes.com/ArticleDisplay.aspx?e=3386139>

Thanks and let me know if there is anything you need from me.

Hello Christine and Mark,
Hope this finds you both well. Just wondering if there is any interest from Council to meet with us on the East Durham WEC as per our earlier correspondence.
We would be happy to meet with them at any time.

Please call me anytime to discuss.
Thanks,

Subject: half load restrictions

Hello Ken,

I was wondering if West Grey had a by-law or mapping as it relates to seasonal half load restrictions. Or is it simply a matter of applying it generically to all gravel roads from Feb to end of April(?), depending on weather.

I ask as it relates to project planning for our East Durham Wind Energy Centre project.

Thanks,

Subject: Met Tower - David and Anne Hartley project

Hello Christine,

Mr Hartley forwarded your letter re: our met tower located on their property. It is our understanding that our met tower is now exempt from any Part V Planning Act controls as per Section 62.0.2 and may remain on the property. However, if there is some outstanding agreement that we entered into with the municipality, that would still be in effect. I'll look into the matter internally and get back to you on that, but if there is any further information you have on that, please don't hesitate to get back to me.

We will work closely with the municipality and the landowner to ensure that any outstanding issues are resolved.

Thanks,

Subject: East Durham WEC receives FIT Contract
Date: Wednesday, July 06, 2011 9:02:00 AM
Attachments: Bruce-Milton Contract List - July 4, 2011.pdf

Hello Christine,

Just wanted to let you know that the East Durham Wind Energy Centre was offered a contract by the Ontario Power Authority. Attached is a list of the projects that were offered contracts yesterday and the link below is to the OPA's news release.

<http://fit.powerauthority.on.ca/projects-enabled-bruce-milton-transmission-line-offered-contracts>

As noted at our last meeting, this is a key step in allowing us to move forward with environmental background work towards a Renewable Energy Approval with the MOE.

Please share this information with staff and Council and if you have any questions, please do not hesitate to contact us.

Take care,
