Appendix C

Glossary of Terms

Appendix C. Glossary of Terms

Non-Negligible Shadow Flicker Source

or equivalently

Significant Shadow Flicker Source

A shadow flicker emission source which is determined to have a significant influence on the resultant shadow flicker exposures at a shadow flicker sensitive receptor. This is typically determined from a combination of site observations, measurements and available sound pressure or power data. Acoustical shielding effects or distance attenuation are often used as justification for excluding sources from this category.

Point of Reception

or

Shadow Flicker Sensitive Receptor

Locations where excessive shadow flicker may disrupt the lives or activities of occupants/residents or in general where excessive shadow flicker would interfere with the intended use of the location under consideration.
