Chief – Joel Abram
Oneida Nation of the Thames
2212 Elm Avenue, Southwold, On
N0L 2G0

25th September 2008

Dear Chief Abram,

Re: Adelaide Wind Energy Project

As an important community leader, we would like to extend an opportunity for you to participate in the Environmental Screening Process for our proposed Adelaide Wind Farm Project.

TCI Renewables is an international wind energy development company with offices in UK, Ireland and Montreal. The company established an office in Montreal in 2006 under the name of Air Energy TCI (AET) in response to Canada's growing demand for clean and renewable electricity sources. AET originally identified two wind energy sites in Quebec and were successful in the recent Hydro-Quebec call for 2000 MW of wind energy. Building on this success AET is also hoping to win contracts in the Ontario Power Authorities RFP for 2000 MW of renewable energy which will be scheduled over the next few years.

As part of the development of a wind farm site a project proponent will undertake detailed environmental and social studies. Commercial scale wind farms are subject to the Environmental Screening Process for Electricity Projects as outlined in *Ontario Regulation 116/01* and the *Guide to Environmental Assessment Requirements for Electricity Projects (Ministry of the Environment, 2001)*. Generally, the Environmental Screening for the project involves identifying the proposed project, determining potential environmental effects, developing mitigation measures, engaging agencies, the public and First Nation and Métis communities, and preparing an Environmental Screening Report (ESR).

AET has identified a potential project in Adelaide area and is undertaking a detailed environmental screening process to determine the potential effects a project in this area might have. Your participation is a valued part of this process and AET would like to take this opportunity to introduce you to the project and request that if you have any comments or queries to please let us know. Our contact information is provided above.

Bkejwanong Territory
Walpole Island
RR#3
Wallaceburg, ON
N8A 4K9

24th February 2009

Dear Chief Gilbert,

Re: Adelaide Wind Energy Project

Further to our letter dated 15th September 2008 and in the context of the results of RES III we would like to follow up with you regarding our proposed Adelaide wind farm project located in Middlesex County. Shortly after our last correspondence we were lead to believe that the Walpole Island First Nation Group were also a registered proponent under the RES III OPA procurement process and hence we concluded that the OPA rules prevented us from continuing a dialogue with you regarding our proposed project at that time.

We believe the Green Energy Act offers a great opportunity for the future, for all renewable projects and as such we are continuing to develop the Adelaide Wind Farm. As part of this development we are completing a detailed Environmental Screening Report and hope to have all of our initial studies completed by April 2009.

We would appreciate any feedback you might have regarding our proposed project and would welcome the opportunity to meet with you to discuss the project and your views in greater detail. Please find enclosed a detailed 'Project Description' for your review; should you require any additional information regarding the proposed Adelaide Wind Farm, please do not hesitate to contact us.

We look forward to hearing from you.

Yours sincerely,

Dear [FIRST NAME] [LAST NAME]:

RE: Notice of an Open House for the Environmental Assessment of the Proposed Adelaide Wind Farm

You are invited to an Open House about the **proposed Adelaide Wind Farm Project**. The proposed Project would produce 72 MW of electricity for Ontario and consist of 40 turbines located on private land parcels located to the north and south of Highway 402 in the Township of Adelaide Metcalfe. Air Energy Inc. is the North American subsidiary of TCI Renewables Ltd. and part of the TCI Group. The company is a leading independent renewable energy business with offices in Great Britain, Ireland and Canada, and interests in over 30 wind power projects in these countries and the United States. We are currently developing wind projects to help meet the Ontario Government's commitment to increasing the use of renewable energy for generating electricity within the Province.

As a company we are committed to full consultation with the public and we would like to give you the opportunity to learn more about our company and the proposed Project. We have completed our environmental assessment studies and will be hosting an Open House from **3:00 p.m. to 8:00 p.m. on Thursday March 26, 2009** at **Adelaide-Metcalfe Township Offices, 2340 Egremont Drive, RR#5 Strathroy, N7G 3H6**. We would like to invite you to meet members of the Project team who will be available to share their knowledge, answer your questions and hopefully provide you with a better understanding of the wind energy sector and the Project itself.

In the meantime, if you have any questions or comments regarding the Project, please do not hesitate to contact me at freephone: 1-888-842-1923 or visit our website at <http://www.tcirenewables.com/> for more information.

22 March 2010

Dear Chief Waddilove,

RE: Adelaide Wind Project

As you will know from my recent correspondence Air Energy TCI (AET) and NextEra Energy Canada (NEC) have formed a strategic partnership to develop the Adelaide Wind Energy project. As you may recall this project was submitted into the Environmental Screening Process last July and had almost reached approval when the Green Energy Act introduced the new Renewable Energy Approval process.

We have been working closely with NEC and Golder Associates (our environmental consultants) to adapt the project documentation so that it can be submitted into the Renewable Energy Approval Process as per Ontario Regulation 359/09.

Whilst NextEra Energy and Air Energy TCI will continue to engage with you across all of our projects, we just wanted to take this opportunity to inform you that we hope to submit the application for the Adelaide project into the Renewable Energy Approval process in the next few weeks and therefore would welcome any feedback written or otherwise that you feel may be useful in the completion of our project documentation.

If there is anything you would like to know about the project or if you require any more detailed information, please do not hesitate to contact me. We would of course also welcome the opportunity to meet and discuss the project at your convenience.

Thank you for your attention and I look forward to any feedback you might have and ongoing communications.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Mark Gallagher".
