Dear Chief Cloud,

RE: Adelaide Wind Project

As you will know from my recent correspondence Air Energy TCI (AET) and NextEra Energy Canada (NEC) have formed a strategic partnership to develop the Adelaide Wind Energy project. As you may recall this project was submitted into the Environmental Screening Process last July and had almost reached approval when the Green Energy Act introduced the new Renewable Energy Approval process.

We have been working closely with NEC and Golder Associates (our environmental consultants) to adapt the project documentation so that it can be submitted into the Renewable Energy Approval Process as per Ontario Regulation 359/09.

Whilst NextEra Energy and Air Energy TCI will continue to engage with you across all of our projects, we just wanted to take this opportunity to inform you that we hope to submit the application for the Adelaide project into the Renewable Energy Approval process in the next few weeks and therefore would welcome any feedback written or otherwise that you feel may be useful in the completion of our project documentation.

If there is anything you would like to know about the project or if you require any more detailed information, please do not hesitate to contact me. We would of course also welcome the opportunity to meet and discuss the project at your convenience.

Thank you for your attention and I look forward to any feedback you might have and ongoing communications.

Yours sincerely,

A handwritten signature in blue ink that reads 'Mark Gallagher'.

To: Joel.abram@oneida.on.ca
Subject: Adelaide Wind Farm

Dear Chief Abram,

I just wanted to follow up with you regarding the information we have sent in the past regarding our Adelaide Wind Project, located in Middlesex County, Ontario. As you may know the Green Energy Act has now been introduced which is encouraging the development of green energy projects such as wind right across Ontario. Whilst the Adelaide project was substantially through the environmental permitting process - we had not yet obtained a power purchase contract and as such the project must now go through the Renewable Energy Approval (REA) process.

As part of this process we have completed an addendum to the environmental information we had completed and I just wanted to make sure you had a link to source this and all of the information about the project;
<http://www.tcirenewables.com/default.aspx?lang=en&page=projects-adelaide>. If you would like a disc or hard copy of the information please let me know.

You should have already received an invitation but just as a reminder we are also having an Open House in Adelaide WG MacDonald School, 29059 School Road, Strathroy, ON, N7G 3H7 on Tuesday 26th January from 5-8pm in the gymnasium. We would welcome the opportunity to meet with you at this event, where we will have various team members with knowledge on all aspects of the project on-hand to answer questions and address any queries you might have.

Thank you,

Mark Gallagher

I.6 November 10, 2010 Letters re. Delivery of ESR/EIS

Appendixes

November 10, 2010

Chief Chris Plain
Chippewas of Asmjiwnaang First Nation
978 Tashmoo Avenue
Sarnia, ON N7T 7H5

DELIVERED

Dear Chief Plain:

Proposed NextEra Energy Canada Adelaide Wind Energy Centre

Please find enclosed a paper copy of draft reports that are required to be finalized and filed for our Adelaide Wind Energy Centre renewable energy application to the Ministry of Environment. You would have previously received correspondence about Adelaide from TCi Renewables, who are now working in partnership with NextEra Energy Canada on this project.

As explained in TCi's previous correspondence, Adelaide was a project that had almost completed the former environmental assessment process, prior to passage of the Green Energy Act. As a result the studies do not precisely follow the same order and names as are set out in Ontario Regulation 359/09, but the information and analysis is equivalent.

Copies of the following reports are enclosed:

1. Environmental Screening Report
2. Draft REA Addendum

Copies of each of the draft reports are also available on TCi Renewables project web site at: <http://www.tcirenewables.com/default.aspx?lang=en&page=projects-adelaide>

As you know, under Ontario Regulation 359/09 NextEra Energy Canada must request a written response to our project proposal from your community. While this request was expressed in previous discussions and correspondence, we wish to formally request that at this time, you provide us with your written response to our Adelaide Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you anticipate and may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra Energy Canada, ULC

5500 North Service Road, Suite 205 | Burlington, Ontario L7L 6W6 | 905 335 4904

NextEra Energy Canada will include your response as part of its Aboriginal consultation report, which is required to be included in its submission for a Renewable Energy Approval from the Ministry of Environment for this project. That report must form part of NextEra Energy Canada's Renewable Energy Application and will therefore be a public document.

As you know, we are available to meet with you to answer any questions or address concerns and would like to do this before submitting our Renewable Energy Application to the Ministry of Environment.

Our plan is to file the Renewable Energy Application with Ministry of Environment as soon as possible, but the Ministry of Natural Resources must first complete its review of our reports for this to happen. Once their review is finished, and the application is filed and accepted as complete by the Ministry of Environment, it will be posted for comment for 30 days and the Ministry will make a decision within 6 months. A second notice of their decision will be posted for comment for 15 days. Both notices will be posted on the Ontario Environmental Registry at www.ebr.gov.on.ca

While this formal Ministry of Environment process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about our project. In this regard, Robert Waldon will contact you or your staff representative to discuss these reports and your response as requested above.

Please contact Robert Waldon at (905) 838-4256 or e-mail: rdwaldon@bedfordC4.com with any questions, but also feel free to contact me if you feel the need.

Yours very truly,

Ben Greenhouse

Chief Joel Abram
Oneida Nation of the Thames
2212 Elm Avenue,
RR # 2
Southwold, ON N0L 2G0

DELIVERED

Dear Chief Abram:

Proposed NextEra Energy Canada Adelaide Wind Energy Centre

Please find enclosed a paper copy of draft reports that are required to be finalized and filed for our Adelaide Wind Energy Centre renewable energy application to the Ministry of Environment. You would have previously received correspondence about Adelaide from TCi Renewables, who are now working in partnership with NextEra Energy Canada on this project.

As explained in TCi's previous correspondence, Adelaide was a project that had almost completed the former environmental assessment process, prior to passage of the Green Energy Act. As a result the studies do not precisely follow the same order and names as are set out in Ontario Regulation 359/09, but the information and analysis is equivalent.

Copies of the following reports are enclosed:

1. Environmental Screening Report
2. Draft REA Addendum

Copies of each of the draft reports are also available on TCi Renewables project web site at: <http://www.tcirenewables.com/default.aspx?lang=en&page=projects-adelaide>

As you know, under Ontario Regulation 359/09 NextEra Energy Canada must request a written response to our project proposal from your community. While this request was expressed in previous discussions and correspondence, we wish to formally request that at this time, you provide us with your written response to our Adelaide Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you anticipate and may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra Energy Canada, ULC

5500 North Service Road, Suite 205 | Burlington, Ontario L7L 6W6 | 905 335 4904

NextEra Energy Canada will include your response as part of its Aboriginal consultation report, which is required to be included in its submission for a Renewable Energy Approval from the Ministry of Environment for this project. That report must form part of NextEra Energy Canada's Renewable Energy Application and will therefore be a public document.

As you know, we are available to meet with you to answer any questions or address concerns and would like to do this before submitting our Renewable Energy Application to the Ministry of Environment.

Our plan is to file the Renewable Energy Application with Ministry of Environment as soon as possible, but the Ministry of Natural Resources must first complete its review of our reports for this to happen. Once their review is finished, and the application is filed and accepted as complete by the Ministry of Environment, it will be posted for comment for 30 days and the Ministry will make a decision within 6 months. A second notice of their decision will be posted for comment for 15 days. Both notices will be posted on the Ontario Environmental Registry at www.ebr.gov.on.ca

While this formal Ministry of Environment process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about our project. In this regard, Robert Waldon will contact you or your staff representative to discuss these reports and your response as requested above.

Please contact Robert Waldon at (905) 838-4256 or e-mail: rdwaldon@bedfordC4.com with any questions, but also feel free to contact me if you feel the need.

Yours very truly,

Ben Greenhouse
Project Director

Chief Alfred Day
Oneida Council of Chiefs
On^yota a:ka Lotiyaneshu
1086 River Road
Southwold, ON N0L 2G0

DELIVERED

Dear Chief Day:

Proposed NextEra Energy Canada Adelaide Wind Energy Centre

Please find enclosed a paper copy of draft reports that are required to be finalized and filed for our Adelaide Wind Energy Centre renewable energy application to the Ministry of Environment. You would have previously received correspondence about Adelaide from TCI Renewables, who are now working in partnership with NextEra Energy Canada on this project.

As explained in TCI's previous correspondence, Adelaide was a project that had almost completed the former environmental assessment process, prior to passage of the Green Energy Act. As a result the studies do not precisely follow the same order and names as are set out in Ontario Regulation 359/09, but the information and analysis is equivalent.

Copies of the following reports are enclosed:

1. Environmental Screening Report
2. Draft REA Addendum

Copies of each of the draft reports are also available on TCI Renewables project web site at: <http://www.tcirenewables.com/default.aspx?lang=en&page=projects-adelaide>

We understand that the location of the Adelaide Wind Energy Centre is in an area where On^yota a:ka Lotiyaneshu may take a lead on behalf of Haudenosaunee governments. A copy of this letter is being sent to Chief Allan MacNaughton to ensure we have made the fullest possible communication. Please let us know if our understanding of this arrangement is correct.

As you know, under Ontario Regulation 359/09 NextEra Energy Canada must request a written response to our project proposal from your community. While this request was expressed in previous discussions and correspondence, we wish to formally request that at this time, you provide us with your written response to our Adelaide Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you anticipate and may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra Energy Canada, ULC

5500 North Service Road, Suite 205 | Burlington, Ontario L7L 6W6 | 905 335 4904

NextEra Energy Canada will include your response as part of its Aboriginal consultation report, which is required to be included in its submission for a Renewable Energy Approval from the Ministry of Environment for this project. That report must form part of NextEra Energy Canada's Renewable Energy Application and will therefore be a public document.

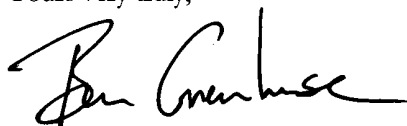

As you know, we are available to meet with you to answer any questions or address concerns and would like to do this before submitting our Renewable Energy Application to the Ministry of Environment.

Our plan is to file the Renewable Energy Application with Ministry of Environment as soon as possible, but the Ministry of Natural Resources must first complete its review of our reports for this to happen. Once their review is finished, and the application is filed and accepted as complete by the Ministry of Environment, it will be posted for comment for 30 days and the Ministry will make a decision within 6 months. A second notice of their decision will be posted for comment for 15 days. Both notices will be posted on the Ontario Environmental Registry at www.ebr.gov.on.ca

While this formal Ministry of Environment process is available to you to express any concerns, as explained above, it is our intention and hope that we can work directly with you for any matters you feel should be discussed about our project. In this regard, Robert Waldon will contact you or your staff representative to discuss these reports and your response as requested above.

Please contact Robert Waldon at (905) 838-4256 or e-mail: rdwaldon@bedfordC4.com with any questions, but also feel free to contact me if you feel the need.

Yours very truly,

Ben Greenhouse

Chief William K. Montour
Six Nations of the Grand River Elected Council
1695 Chiefswood Road,
PO Box 5000
Ohsweken, ON N0A 1M0

DELIVERED

Dear Chief Montour:

Proposed NextEra Energy Canada Adelaide Wind Energy Centre

Please find enclosed a paper copy of draft reports that are required to be finalized and filed for our Adelaide Wind Energy Centre renewable energy application to the Ministry of Environment. You would have previously received correspondence about Adelaide from TCi Renewables, who are now working in partnership with NextEra Energy Canada on this project.

As explained in TCi's previous correspondence, Adelaide was a project that had almost completed the former environmental assessment process, prior to passage of the Green Energy Act. As a result the studies do not precisely follow the same order and names as are set out in Ontario Regulation 359/09, but the information and analysis is equivalent.

Copies of the following reports are enclosed:

1. Environmental Screening Report
2. Draft REA Addendum

Copies of each of the draft reports are also available on TCi Renewables project web site at: <http://www.tcirenewables.com/default.aspx?lang=en&page=projects-adelaide>

We are providing this letter and materials to you based on the Six nations Elected Council policy expressing their responsibility to the environment within the 1701 Nanfan Treaty Territory. An equivalent letter and reports have been sent to both the Oneida Council of Chiefs and Six Nations Confederacy Council, which we understand to be the appropriate protocol.

As you know, under Ontario Regulation 359/09 NextEra Energy Canada must request a written response to our project proposal from your community. While this request was expressed in previous discussions and correspondence, we wish to formally request that at this time, you provide us with your written response to our Adelaide Wind Energy Centre proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the final reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. Kindly advise us of your views on:

1. Any anticipated adverse impacts you feel that our project may have on your constitutionally protected Aboriginal or treaty rights, and;

I.7 November 2, 2011 Letters re. Project Update Public Meeting and enclosing copy of Project Description Report

November 2, 2011

Chief Christopher Plain
Chippewas of Aamjiwnaang (Chippewas of Sarnia)
978 Tashmoo Avenue
Sarnia, Ontario
N7T 7H5

Dear Chief Plain:

Subject: NextEra Energy Canada, ULC Wind Energy Projects

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

First, we want to let you know about a Public Open House concerning the transmission line route for three of our projects (the Adelaide, Bornish and Jericho projects). The enclosed *Notice of Project Update Meeting* explains that a Public Open House will be held on November 10, 2011 at the Ailsa Craig Community Centre, 155 Annie Ada Shipley Street, Municipality of North Middlesex. The purpose of this meeting is to provide information about proposed changes to the transmission line route for these three projects. Each of these three wind projects has already had at least one public open house for the wind centres (i.e., the wind turbine generators). The enclosed notice is for an open house that focuses on a transmission line route change, not the wind energy centres.

Second, we want to let you know about Public Open Houses to be held on December 7 and 8, 2011 for our Bluewater and Goshen projects, respectively. Although Public Open Houses have been held for these projects before, these are considered “first” open houses in the municipalities of Bluewater and Huron East.

Ontario Regulation 359/09 requires us to provide you with these notices. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

We also wish to acknowledge that these Public Open Houses are separate from (and in addition to) our ongoing dialogue with you and your community, and do not replace our procedural consultation efforts.

In addition to the Bluewater and Goshen *Notices of Public Meetings*, we are enclosing copies of updated Project Description Reports for five projects (i.e., Adelaide, Bluewater, Bornish, Goshen and Jericho). These reports describe projects that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to these copies, the reports

can be downloaded from our web site at www.NextEraEnergyCanada.com. Please let us know if you feel the above list of five projects is not correct.

These updated Project Description Reports are general documents. They will be followed by draft studies that contain more specific information on these projects. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or rdwaldon@bedfordC4.com with any questions.

Sincerely,

Thomas Bird
