R.R # 1
Muncey, ON N0L 1Y0

Dear Chief Patrick:

Re: Meeting of January 24th

Thank you for your interest in our proposed wind farm projects in Lambton, Huron and Middlesex Counties. Our team was very eager to meet with you and other First Nations at the meeting arranged for January 24th at the Four Winds Centre in Kettle Point. We understand that you were called to an urgent meeting at the same time that prevented any representation from your community at our meeting. We are disappointed that we were unable to meet, but would like to continue our dialogue with you.

Attached please find a copy of the presentation that we were to give at the January 24 meeting with some background information on our company, along with copies of the Notices of Commencement for 3 environmental assessments.

Our first public information centres for the environmental assessments are scheduled for February 19th and 20th, as detailed in the attached notices. We encourage you and members of your community to attend these meetings to become more familiar with the projects and the development process, and to allow us to answer any of your questions. Additionally, we would be pleased to meet with you earlier in the day on February 19th and 20th, or another time that is convenient for you. Jason Henry will be in touch with you soon to schedule another meeting.

Following the completion of the environmental studies, we will hold a second public information centre for each of the projects in the fall. We appreciate your interest in our projects, and look forward to working with you.

Yours sincerely,

A handwritten signature in black ink that reads 'M DeBock'.

Subject: Wind Farm Projects in Middlesex and Lambton Counties

Dear Dr. Jacobs

My name is Ben Greenhouse, and I manage the environmental assessment and consultation processes at FPL Energy as they relate to the development of Wind Farms in Canada.

I have seen a copy of Chief Joseph's letter of February 5th, 2008 to NRCan and Environment Canada ("Wind Farms in Walpole Island First Nation Territory and the Need to Consult and Accommodate"), and understand the need to consult with WIFN in developments of this kind. FPL Energy, together with Canadian Green Power, has commenced the environmental screening process for four wind farms in Middlesex and Lambton Counties. To our knowledge, these projects are not on WIFN traditional territory. Unfortunately, the map of WIFN traditional territories that was attached to the letter was not included in the copy I received, so I cannot be sure. If it would be possible to receive a copy of the map for future reference, I would appreciate it. Regardless, I wanted to ensure that the WIFN was aware of our projects.

I have attached the notices of commencement we have issued that show the general locations of the areas of studies we have delineated. I would be happy to share further information on these projects if desired, but realize that you must be swamped with information at this point, so wanted to ensure that there was interest before sending over further information. If you have any questions, or would like any additional information, please feel free to contact me by email, mail, or phone at your convenience.

I look forward to hearing from you.

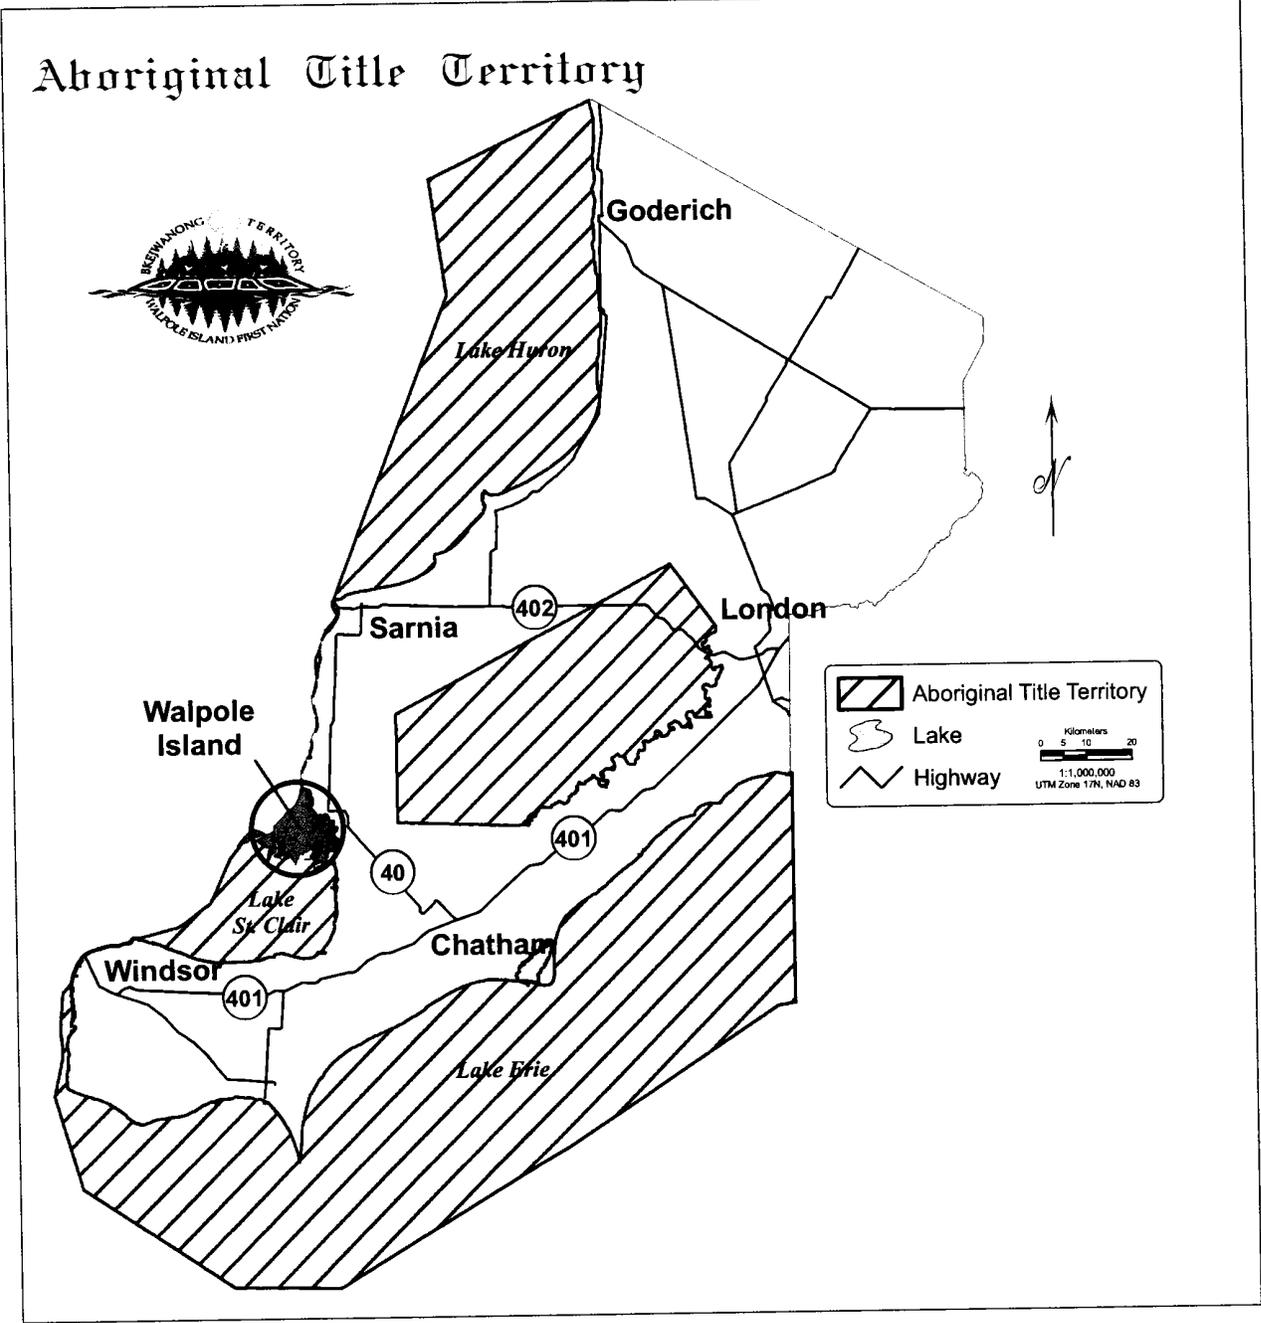

Sincerely,

Ben Greenhouse

Re: **Wind Farms in Walpole Island First Nation Territory and Need to Consult and Accommodate**

Dear Sirs:

Walpole Island First Nation is aware that a number of wind energy projects are being proposed throughout parts of WIFN's traditional territory in southwestern Ontario.

WIFN has the right to consultation and accommodation in respect of these wind projects, as they have the potential to impact WIFN's aboriginal and treaty rights and claims (including aboriginal title) in this area. WIFN is also interested in exploring potential opportunities for partnerships and other economic benefits from these projects.

WIFN holds treaty rights to some of its vast traditional territory, and has asserted claims in court for aboriginal title and rights to another large part of its territory.

R.R. #3, WALPOLE ISLAND, ONTARIO N8A 4K9 • TEL: (519) 627-1481 • FAX: (519) 627-0440

WIFN holds a respected leadership role in environmental stewardship. It has much to share with federal and provincial governments and project proponents. WIFN takes this leadership role very seriously and wishes Canada and Ontario to understand, which we think is the case, that WIFN's voice about wind farm development is a voice that will contribute meaningfully to sustainable development of wind resources.

While WIFN was contacted about various wind projects, we, as with many First Nations, do not have the human resources or financial capacity to participate in meaningful and bona fide consultations and negotiations without support. This is especially so given the large number of wind projects and their various stages of advance. No such support has been offered or forthcoming from any affected government ministry. Further, to my knowledge, no separate process has been established to provide for consultation with and accommodation of WIFN in any substantive way in relation either to specific wind projects or wind energy development in our territory in general. As such, WIFN has not been adequately consulted or accommodated to date.

We therefore request the following:

- Immediate notification and description of the status of each project listed below (and any other proposed wind energy project in WIFN traditional territory, a map of which is provided). Such status reports should be directed to Dr. Dean Jacobs, Director of Walpole Island Heritage Centre, at 519-627-1530 (fax) and Dean.Jacobs@wifn.org.
- Commitment from each affected Ministry (federal and provincial) to appoint an appropriate representative to contact WIFN within the near future to set a date for a meeting between WIFN and these representatives, for the purpose of establishing a workable consultation and accommodation process or protocol and funding for same. Such individuals should contact Dr. Dean Jacobs at 519-627-1475 (phone) and Dean.Jacobs@wifn.org.

The wind projects in WIFN territory of which we are aware are:

- Port Alma Wind Power Project (Kruger Energy): 101 MW in Chatham-Kent
- South and East Lake St. Clair Wind Farm projects (AIM PowerGen Corporation): 80 and 150 MW in wind farms respectively
- Nine wind farms in southwest Ontario (Gengrowth Renewables Inc.): each with 4-6 turbines generating up to 10 MW
- Dover and Raleigh Wind Farms (Petawawa Renewable Power Corporation and Invenergy Services Canada ULC)
- Gosfield Comber Wind Energy project (Brookfield Energy).

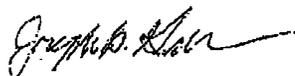

Please contact Dr. Jacobs as soon as possible to arrange a meeting to discuss the consultation and accommodation process or protocol and funding. We also look forward to status reports for the above wind energy projects and any others in WIFN traditional territory.

I.2 October 26, 2009: Notice of “second” Open House #1 and Initial Draft Reports

NextEra Energy Canada, ULC

Chris Plain
Aamajiwnaang (Sarnia)
978 Tashmoo Ave
Sarnia, ON N7T 7H5

October 26, 2009

Subject: Proposed NextEra Energy Canada “Bornish” Wind Farm

Dear Chris Plain,

I hope you are doing well and are enjoying the Fall. In January of last year, I attempted to meet with you and other Aamajiwaang community members to discuss the Bornish Wind Farm being developed by NextEra Energy Canada, ULC. At that time our company was called FPLE Canadian Wind, ULC. It was unfortunate that you were called away unexpectedly and we weren't able to meet. We sent a follow up letter to invite you to our first public meeting which was held in February, 2008 near Parkhill, ON and had hoped to see you there. At this time, I wanted to follow up to let you know that we have completed the drafts of our studies for the Bornish project and we plan to submit the project for approval under the new Renewable Energy Approval process in January 2010. I have enclosed these drafts along with an executive summary of our report.

NextEra Energy Canada respects the rights of First Nations in regard to the Crown's Duty to Consult. We are committed to providing timely information to support that process, to strive for positive relationships and also to comply with our obligations under the Province of Ontario's new Renewable Energy Approval (“REA”) process.

We respectfully ask that you advise us if a meeting with yourself, council and/or any other interested members of your community is desired to discuss our REA submission and our project. The perspectives and interest of your community are important, and we wish to include your comments in our final submission in January 2010.

Understanding that you, your council, and your staff have many demands on your time, we would be happy to provide assistance for your review of our REA submission. If this is of interest, please let me know and we can discuss the details.

We are holding a second public meeting for this project on January 5th from 4:00-8:00 at the North Middlesex District High School in Parkhill. As with last year's meeting, we would welcome attendance from anyone in your community.

Best regards,

Subject: Proposed NextEra Energy Canada “Bornish” Wind Farm

Dear Chief Cloud,

I hope you are doing well and are enjoying the Fall. On June 12th of this year I sent a letter to provide you an update regarding the archaeological work being conducted at our Bornish and Strathroy A, B, and C wind project development sites. I wanted to follow up at this time to let you know that we have completed the drafts of our studies for the Bornish project and we plan to submit the project for approval under the new Renewable Energy Approval process in January 2010. I have enclosed these drafts along with an executive summary of our report.

NextEra Energy Canada respects the rights of First Nations in regard to the Crown’s Duty to Consult. We are committed to providing timely information to support that process, to strive for positive relationships and also to comply with our obligations under the Province of Ontario’s new Renewable Energy Approval (“REA”) process.

We respectfully ask that you advise us if a meeting with yourself, council and/or any other interested members of your community is desired to discuss our REA submission and our project. The perspectives and interest of your community are important, and we wish to include your comments in our final submission in January 2010.

Understanding that you, your council, and your staff have many demands on your time, we would be happy to provide assistance for your review of our REA submission. If this is of interest, please let me know and we can discuss the details.

We are holding a Public Information Centre on this project on January 5th from 4:00-8:00 at the North Middlesex District High School in Parkhill. We will publish a notice of this meeting in your community newsletter, but, as we have discussed, if you feel a meeting specific to your community would be of interest, please let me know.

As per your request I have also provided Patricia Shawnoo with a copy of this package. I’d ask that you or Patricia feel free to contact me if you wish to arrange a meeting or if you have any questions about the information we have provided.

Best regards,

A handwritten signature in black ink that reads "Ben Greenhouse". The signature is written in a cursive style.

William Big Bull
R.R.#3
Wallaceburg, ON N8A 4K9

October 26, 2009

Re: Bornish Wind Farm

Dear Mr. Big Bull,

I hope this letter finds you well. NextEra Energy Canada (formerly FPLE Canadian Wind) met with Toni Nahdee and Dr. Dean Jacobs in August last year. At that time, we introduced our Bornish wind farm project, located in the Parkhill area, and our larger plans for the area. I am writing to let you know that we have completed our studies for the Bornish project and we plan to submit the project for approval under the new Renewable Energy Approval process in January 2010. I have enclosed these drafts along with an executive summary of our report.

NextEra Energy Canada respects the rights of First Nations in regard to the Crown's Duty to Consult. We are committed to providing timely information to support that process, to strive for positive relationships and also to comply with our obligations under the Province of Ontario's new Renewable Energy Approval (REA) process.

We respectfully ask that you advise us if a meeting with yourself, council and/or any other interested members of your community is desired to discuss our REA submission and our project. The perspectives and interest of your community are important, and we wish to include your comments in our final submission in January 2010.

Understanding that you, council, and your staff have many demands on your time, we would be happy to provide assistance for your review of our REA submission. Dr. Jacobs had indicated that Walpole Island had retained the services of Don Richardson from AECOM. We have been in contact with Mr. Richardson, and are willing to engage him if this continues to be the wish of the Walpole Island First Nation. Please let me know how you would like to proceed and we can discuss the details.

We are holding a Public Information Centre on this project on January 5th from 4:00-8:00 at the North Middlesex District High School in Parkhill. We hope that you, or any interested member of the Walpole Island First Nation will plan to attend in order learn more about NextEra Energy Canada and this exciting project. If you think it would be appropriate, we would be willing to publish a notice of

this meeting in your community newspaper closer to the date of the meeting. Please advise whether this would be desirable.

Please contact me if you wish to arrange a meeting or if you have any questions about the information we have provided.

Best regards,

A handwritten signature in black ink that reads "Ben Greenhouse". The signature is written in a cursive style with a large, stylized initial "B".

I.3 January 25, 2010: Section 17 Request #1

Appendix

NextEra Energy Canada, ULC

January 25, 2010

Chief Chris Plain
Chippewas of Aamjiwnaang First Nation
978 Tashmoo Avenue
Sarnia, Ontario
N7T 7H5

Dear Chief Plain:

Subject: Proposed NextEra Energy Canada Bornish Wind Energy Centre

I am writing to follow-up from my October 26, 2009 letter about the Bornish Wind Energy Centre.

We provided a copy of the October 26, 2009 "Bornish Wind Farm Project Draft REA Documents for Consultation" including appendixes with my letter. As you know, NextEra Energy Canada must file a final version of those documents with Ministry of the Environment to request a Renewable Energy Approval ("REA"), as described in Ontario Regulation 359/09. Since then, I understand a third party consultant has assisted in reviewing the Draft REA Documents, and a meeting has taken place with Aamjiwnaang staff and the consultant to discuss his draft report.

Under section 17 of that Regulation, NextEra is required to request a written response to our project proposal from your community. That is the purpose of this letter.

We respectfully request that at this time, you provide us with your written response to the Bornish Wind Energy Centre project proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. This may include your views on:

1. Any anticipated adverse impacts our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra will include your response as part of its Aboriginal consultation program report, to be included in its submission for a Renewable Energy Approval for this project from the Ministry of Environment.

Our plan is to submit the Renewable Energy Application for this project by March 1, 2010.

Please be assured however, that NextEra representatives will be available to continue dialogue with you and/or your staff after this date, if you feel additional information is needed or if you have follow-up questions about our project.

In addition, we plan to continue providing updates and information to your community, throughout the project process.

January 25, 2010
Page 2 of 2

Please contact David Miller of McLeod Wood Associates who is on contract to be our contact person in this file, or Bob Waldon, who is coordinating our Aboriginal program, with any questions or comments.

Thank you for your assistance.

Yours very truly,

Dear Chief Waddilove:

Subject: Proposed NextEra Energy Canada Bornish Wind Energy Centre

I am writing to follow-up from my October 26, 2009 letter about the Bornish Wind Energy Centre.

We provided a copy of the October 26, 2009 "Bornish Wind Farm Project Draft REA Documents for Consultation" including appendixes with my letter. As you know, NextEra Energy Canada must file a final version of those documents with Ministry of the Environment to request a Renewable Energy Approval ("REA"), as described in Ontario Regulation 359/09.

Under section 17 of that Regulation, NextEra is required to request a written response to our project proposal from your community. That is the purpose of this letter.

We respectfully request that at this time, you provide us with your written response to the Bornish Wind Energy Centre project proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. This may include your views on:

1. Any anticipated adverse impacts our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra will include your response as part of its Aboriginal consultation program report, to be included in its submission for a Renewable Energy Approval for this project from the Ministry of Environment.

Our plan is to submit the Renewable Energy Application for this project by March 1, 2010.

Please be assured however, that NextEra representatives will be available to continue dialogue with you and/or your staff after this date, if you feel additional information is needed or if you have follow-up questions about our project.

In addition, we plan to continue providing updates and information to your community, throughout the project process.

January 25, 2010

Dear Mr. Big Bull:

Subject: Proposed NextEra Energy Canada Bornish Wind Energy Centre

I am writing to follow-up from my October 26, 2009 letter about the Bornish Wind Energy Centre and our meeting last week.

We provided a copy of the October 26, 2009 "Bornish Wind Farm Project Draft REA Documents for Consultation" including appendixes with my letter. As you know, NextEra Energy Canada must file a final version of those documents with Ministry of the Environment to request a Renewable Energy Approval ("REA"), as described in Ontario Regulation 359/09.

Under section 17 of that Regulation, NextEra is required to request a written response to our project proposal from your community. That is the purpose of this letter.

We respectfully request that at this time, you provide us with your written response to the Bornish Wind Energy Centre project proposal. We ask that your response include any information that you and/or your community feel should be considered as part of the reports to be submitted to the Ministry of the Environment for our Renewable Energy Application. This may include your views on:

1. Any anticipated adverse impacts our project may have on your constitutionally protected Aboriginal or treaty rights, and;
2. Any other concerns over potential negative impacts to the environment that you may have an interest in, and;
3. Any suggestions you have for mitigating the impacts identified in #1 and #2.

NextEra will include your response as part of its Aboriginal consultation program report, to be included in its submission for a Renewable Energy Approval for this project from the Ministry of Environment.

Our plan is to submit the Renewable Energy Application for this project by March 1, 2010.

Please be assured however, that NextEra representatives will be available to continue dialogue with you after this date, if you feel additional information is needed or if you or other staff have follow-up questions about our project.

In addition, we plan to continue providing updates and information to Walpole Island First Nation, throughout the project process.

I would also like to thank you and Gerry MacBeth for taking time to meet with David Miller, Bob Waldon and myself. We agreed that the meeting was "without prejudice" and we will record it as such in our record of contacts to be filed as part of the REA approval process. To ensure there are no concerns, however, we would like that record to mention that the topics discussed in general terms at the meeting included the Walpole Island Consultation and Accommodation Protocol, monitoring of archaeological field work, and the concept of an economic claim to energy development. No further details will be provided.

Finally, as you requested, we are preparing information on other NextEra projects that would fall within the territory described in the Consultation and Accommodation Protocol, and will send this to you.

We look forward to receipt of the proposed draft Non-Disclosure Agreement for our review, and to another meeting about our Bornish and other projects as soon as possible.

Please contact David Miller of McLeod Wood Associates who is on contract to be our contact person in this file, or Bob Waldon, who is coordinating our Aboriginal program, with any questions or comments.

Thank you for your assistance.

Yours very truly,

Ben Greenhouse
Project Director

I.4 November 2, 2011: Transmission Line Route Change and Draft PDR

November 2, 2011

Chief Christopher Plain
Chippewas of Aamjiwnaang (Chippewas of Sarnia)
978 Tashmoo Avenue
Sarnia, Ontario
N7T 7H5

Dear Chief Plain:

Subject: NextEra Energy Canada, ULC Wind Energy Projects

We are writing this letter (in accordance with Ontario Regulation 359/09) to share updated information with you about our wind projects in southwestern Ontario.

First, we want to let you know about a Public Open House concerning the transmission line route for three of our projects (the Adelaide, Bornish and Jericho projects). The enclosed *Notice of Project Update Meeting* explains that a Public Open House will be held on November 10, 2011 at the Ailsa Craig Community Centre, 155 Annie Ada Shipley Street, Municipality of North Middlesex. The purpose of this meeting is to provide information about proposed changes to the transmission line route for these three projects. Each of these three wind projects has already had at least one public open house for the wind centres (i.e., the wind turbine generators). The enclosed notice is for an open house that focuses on a transmission line route change, not the wind energy centres.

Second, we want to let you know about Public Open Houses to be held on December 7 and 8, 2011 for our Bluewater and Goshen projects, respectively. Although Public Open Houses have been held for these projects before, these are considered “first” open houses in the municipalities of Bluewater and Huron East.

Ontario Regulation 359/09 requires us to provide you with these notices. We also want to keep you informed about public activities that may prompt questions, or be of interest to you and your community.

We also wish to acknowledge that these Public Open Houses are separate from (and in addition to) our ongoing dialogue with you and your community, and do not replace our procedural consultation efforts.

In addition to the Bluewater and Goshen *Notices of Public Meetings*, we are enclosing copies of updated Project Description Reports for five projects (i.e., Adelaide, Bluewater, Bornish, Goshen and Jericho). These reports describe projects that you, or the Director of Renewable Energy Approvals has indicated are relevant to your community. In addition to these copies, the reports

can be downloaded from our web site at www.NextEraEnergyCanada.com. Please let us know if you feel the above list of five projects is not correct.

These updated Project Description Reports are general documents. They will be followed by draft studies that contain more specific information on these projects. Once finalized, the studies will be part of our submission to Ministry of Environment for a Renewable Energy Approval.

Our consultant Bob Waldon has been in contact with your staff about these projects since they were first announced, and will follow-up soon to discuss the information with you. Please feel free to contact him at (905) 838-4256 or rdwaldon@bedfordC4.com with any questions.

Sincerely,

Thomas Bird
