Subject: NextEra Energy Canada, East Durham Wind Energy Project

Dear Ms. Vokes:

East Durham Wind, Inc., a wholly owned subsidiary of NextEra Energy Canada, ULC (NextEra) is proposing to construct a wind energy project in the Municipality of West Grey in Grey County, Ontario. The Project will be referred to as the East Durham Wind Energy Centre and will be located on private lands south of Concession 6, west of Sideroad 40, Artemesia-Glenelg Townline and Sideroad 50, east of Baseline Road and north of West-Grey Southgate municipal boundary. With a total maximum name plate capacity of up to 23-megawatts (MW), the Project is categorized as a Class 4 facility. Although NextEra is seeking a Renewable Energy Approval (REA) for 16 wind turbines, up to a total of 14 are proposed to be constructed for the Project.

As you are aware, a public meeting for this Project is scheduled for January 15, 2013. This meeting was originally scheduled as an open house where members of the public could arrive at their convenience and speak directly with Project representatives. We are providing you with an updated notice to inform you of the change in meeting format. Although the meeting will still include an open house component, in response to comments received, NextEra has elected to add a formal, professionally facilitated question and answer session starting at 6:30 PM.

Please do not hesitate to contact myself or Derek Dudek (Derek.Dudek@nexteraenergy.com) should you have any questions.

Yours very truly,

Thomas Bird,
Environmental Services Project Manager
