

East Durham Wind Energy Centre

Overview

- » Located in Grey County, Ontario
- » Operated by a subsidiary of NextEra Energy Canada
- » up to 23-megawatt wind generation plant
- » up to 14 wind turbines which will be capable of generating enough electricity to power nearly 7,000 homes
- » Each turbine will be approximately 80 metres tall from the ground to the hub in the center of the blades
- » Commercial operation anticipated to begin in 2013

Benefits

- » Provides employment opportunities
- » Adds tax base to the county
- » Delivers landowner lease payments
- » Creates no air or water pollution
- » Uses no water in power generation
- » Allows land to remain in agricultural use
- * Supports economy through purchases of regional goods and services

Projected Economic Impact

Construction Jobs:	150
Full Time Operations Jobs:	2 - 3
Capital Expenditures:	\$67 Million
Corporate Income Tax:	\$26 Million*
Property Taxes:	\$1.5 Million*
Landowner Payments:	\$4.7 Million*

*Estimated over first 20 years of the project.

Overall Economic Impact for Ontario

- » NextEra Energy Canada's planned 616 MWs of wind power will generate approximately 3,000 or more on site, supply chain, and induced jobs for Ontario during construction.
- » This translates into over almost \$200 million in earnings and \$500 million in economic output for Ontario during construction.
- » Annually, NextEra Energy Canada's planned 616 MWs of wind power will provide over 100 on site, supply chain, and induced jobs for Ontario during each year of operation.
- » This translates into almost \$7 million in earnings and \$19 million in economic output for Ontario during operations annually.

All figures are estimated and subject to change.

About NextEra Energy Canada

- » A leading renewable energy developer in Canada.
- » Focused on developing electricity derived from clean, renewable sources throughout the provinces.
- » A subsidiary of NextEraEnergy Resources, LLC., the largest generator of wind energy in North America.
- » NextEra Energy Resources is the leading clean energy provider operating wind, natural gas, solar, hydroelectric and nuclear power plants.
- » More than 16,700 megawatts of generating capacity in North America
- » Approximately 95 percent of our electricity comes from clean or renewable sources
