We are very concerned that we were not informed of the project at all until receiving the Notice to this meeting. Although we understand that present evidence suggests only health concerns centering on noise and "presence" there may be many other issues. Granted there may only be a low level of activity in the general public - but problems may still be there, and need to be identified. We suggest that the project be placed on hold until third party reviews are available + we have Canadian data. This may prove to be a winning strategy for all concerned, and not have NextEra end up in court for decades.

THE LAND OWNERS MAKE A PROFIT, BUT HYDRO RATES AREN'T COMING DOWN FOR THE AVERAGE HOME OWNER. WE ACTUALLY PRODUCE MORE ELECTRICITY THAN WE CAN USE AND SELL SURPLUS TO THE STATES. JUST ANOTHER GOVERNMENT OF ONTARIO ATTEMPT TO ~~TOO~~ GET LIBORAL NOTES USING 'CLEAN ENERGY' AS THE JUSTIFICATION! THE TURBINES ARE HORRIBLE TO LOOK AT - THE NATURAL SKYLINE IS RUINED. IN AN AREA THAT TRYS TO ATTRACT TOURISTS, THESE WILL BE A REAL TURN OFF. UNFORTUNATELY, THE FINANCIAL INCENTIVES ARE VERY ATTRACTIVE TO FARMERS STRUGGLING TO MAKE A LIVING. HOPEFULLY, IN 25 YEARS, YOUR COMPANY WILL STILL BE AROUND TO DECOMMISSION THESE MACHINES. WHY NOT BUILD THESE IN SPARSELY POPULATED AREAS? WHY PUT THEM IN RESIDENTIAL AREAS / TOURIST AREAS. SHELBURNE IS PROOF OF HOW TURBINES CAN DESTROY PROPERTY VALUES AND THE NATURAL LANDSCAPE. HOPEFULLY, THE FEDERALLY FUNDED HEALTH REVIEW OF TURBINES WILL PROVIDE SOME EVIDENCE THAT CAN BE USED TO STOP THIS DEVELOPMENT.

5. Please provide your comments or questions in the space provided below:

I would be in favour of wind energy in this province if the turbine construction sites included areas closer to suburbia - there are both transmission grids & wind but more population to resist, this is totally unfair and if everyone is not going to embrace wind energy for the right reasons & take both the good & the bad, then rural Ontario should not be forced to either - only because it is the path of least resistance. Wind turbines should be everywhere - including in lakes, and destroying the beautiful views from the million dollar lakefront estates.

- I'm at 7th Conc., 40th Siderd. Our wind is noticeably less this year. What are your plans for turbines that can't produce what you predict?*

Please explain: Unreliable nature of elec. production due to uncontrollable winds (Farndale); no way to store energy until it is needed in system; selling our elec. at a loss because of wind contracts.

5. Please provide your comments or questions in the space provided below:

Someone made an excellent suggestion in the local newspaper; since most of this energy will go to GTA + Metro, put the turbines down there - the lakeshore would be good. People could then see what is creating their expensive power. Why do we have to have our area blighted for their benefit?

Another point - Did anyone ever consider solar panels with turbines, as one will be apt to produce energy when the other doesn't? This could overcome some of the unpredictability of wind power.

I have visited wind farms in the Gaspé + PEI - in non-inhabited, high land - great wind, no people. That's quite different from this area.

Who's doing bird & other wildlife studies? Is the "Fox" studying the "bees"? Must be completely independent group - not NextEra.
